Subject: FW: Return to Office Delayed; Complying with Presidential Executive Order Requiring COVID-19 Vaccines for Employees of Federal Contractors

Questions to HR, Lawyers, Execs and for the Wed Town hall...

- A. Why is WSP assuming Biden is President?
- B. Are you aware of the list of employers not requiring employees to get vaccinated? 1) The White House, 2) CDC, 3) FDA, 4) WHO, 5) Moderna, 6) Pfizer, 7) JnJ
- C. Please confirm the company hasn't received any additional Covid funds from the government OR as part of enforcing this mandate?
- D. What was the outcome determined from the cost differences between Government Fines and 1A class action lawsuits?
- E. What was the outcome determined by the officers of WSP USA with regards to the personal liability lawsuits under Nuremberg Code they will be served with as a result of this decision?

As your employee, I am requesting that you review this document, provide the requisite information, and sign the form, in regards to your requirement that employees get a Covid-19 emergency use authorization (EUA) investigational vaccine.

1) If I agree to receive an EUA Covid-19 injection, does my employee health insurance plan provide complete coverage should I experience an adverse event, or even death?

2) As an employee, does my life insurance policy provide any coverage in the event that I die from receiving an EUA Covid-19 injection?

3) As an employee, will you be providing Workers' Compensation, disability insurance, or other resources if I have an adverse event to an EUA Covid-19 injection and am unable to come to work for days, weeks, or months, or if I am disabled for life?

4) The Food and Drug Administration (FDA) requires that EUA vaccine recipients be provided with certain vaccine-specific information to help them make an informed decision about vaccination. The EUA fact sheets that must be provided are specific to each authorized Covid-19 injection are 8 developed by

the manufacturers of the injections (Pfizer/BioNTech, Moderna, Oxford/AstraZeneca, and the Johnson & Johnson subsidiary Janssen). The fact sheets must provide the most current and up-to-date information on the injections, and vaccine recipients must also receive information about adverse events. Have you read, understood, and provided me (and all other employees) with these fact sheets and with current information on adverse events so that I/we can make an educated decision?

5) Have you reviewed the available databases of material adverse events reported to date for people who have received Covid-19 injections 9,10,11,12 Potential and reported adverse events include death, anaphylaxis, neurological disorders, autoimmune disorders, other long-term chronic diseases, blindness and deafness, infertility, fetal damage, miscarriage, and stillbirth.

6) The FDA's guidance 13 on emergency use authorization of medical products requires the FDA to "ensure that recipients are informed to the extent practicable given the applicable circumstances... [t]hat they have the option to accept or refuse the EUA product...." Are you aware of this statement? Have you informed all employees that they have the option to refuse?

7) With respect to the emergency use of an unapproved product, the Federal Food, Drug and Cosmetic Act, Title 21 U.S.C. 360bbb-3(e)(1)(A)(ii)(I-III)¹⁴ reiterates that individuals be informed of "the option to accept or refuse administration of the product, [and] of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." If EUA Covid-19 investigational vaccines are ever approved by the FDA, state legislation would be required to allow companies to mandate the Covid-19 injections. Are you aware of these facts?

8) EUA products are unapproved, unlicensed, and experimental. Under the Nuremberg Code—the foundation of ethical medicine—no one may be coerced to participate in a medical experiment. The individual's consent is absolutely essential. No court has ever upheld a mandate for an EUA vaccine. In Doe #1 v. Rumsfeld, 297 F. Supp. 2d 119 (2003)¹⁵, a federal court held that the U.S. military could not mandate EUA vaccines for soldiers: "...[T]he United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs" (Id. at 135). Are you aware of this?

9) The United States Code of Federal Regulations¹⁶ and the FDA require the informed consent of human subjects for medical research. The EUA Covid-19

Tomeo Family Court

injections are unapproved, unlicensed, investigational vaccines that are still in their experimental stage. It is unlawful to conduct medical research on a human being, even in the event of an emergency, unless steps are taken to secure the informed consent of all participants. Are you aware of this?

10) According to Federal Trade Commission (FTC) Guidelines 17 and the FTC's "Truth In Advertising,"¹⁸ promotional material—and especially material involving health-related products—cannot mislead consumers, omit important information, or express claims. All of this falls under the rubric of "deceptive advertising" (whereby a company is providing or endorsing a product), whether presented in the form of an ad, on a website, through email, on a poster, or in the mail. For example, statements such as "all employees are required to get the Covid-19 vaccine to make the workspace safe" or "it's safe and elective" leave out critical information. Critical information includes the facts that Covid-19 injections are unapproved EUA vaccines that "may" or "may not" prevent Covid, won't necessarily make the workspace safer, and could in fact cause harm. Not providing links or attachments of the manufacturers' fact sheets and current information on adverse events is omitting safety information. Are you aware of this?

11) Since the Covid lockdowns began over one year ago, there have been over 178 reported breaches of unsecured protected health information (PHI), incidents investigated by the Once for Civil Rights (OCR). These breaches exposed millions of people's personal health information. Although many of these incidents were attributed to hacking, some of the breaches to PHI fell directly under the 1996 Health Insurance Portability and Accountability Act (HIPAA), such as sharing a patient's or person's information with an unauthorized individual or incorrectly handling PHI. 19 Can you please explain your obligations to me, under HIPAA law, and how you are going to protect my personal information - both with respect to your requirement that I receive this injection?

12) Whereas pharmaceutical companies that manufacture EUA vaccines have been protected from liability related to injuries or deaths caused by experimental agents since the PREP Act¹ was enacted in 2005, companies and all other institutions or individuals who mandate experimental vaccines on any human being are not protected from liability. Are you aware that you do not enjoy such liability protection?

13) Are you aware that employees could file a civil suit against you should they suffer an adverse event, death, or termination from their place of employment?

As the legally authorized officer of the employer/company, I have read all of the above information, have provided my employees with all of the information that the FDA requires be provided to recipients of the Covid-19 injections, and do hereby agree to assume 100% financial responsibility for covering any and all expenses from adverse events, including death, through insurance coverage or directly. In addition, I affirm that the employee will not be subjected to the loss of their job should they decline to receive a Covid-19 injection.

Subject: Return to Office Delayed; Complying with Presidential Executive Order
Requiring COVID-19 Vaccines for Employees of Federal Contractors

This message was sent to all staff at WSP USA and will be distributed to recently acquired companies shortly.

Colleagues,

We all are ready to put COVID in the rearview mirror, but our efforts to protect ourselves, each other and our families against the pandemic must continue. While the rates of new cases and hospitalizations have fallen in the U.S. overall in recent weeks, hot spots for infections exist in many areas of the country. As conditions change, we continue to remain agile and flexible.

Page 63 of 92

Tomeo Family Court

In This Message

Today, we are sharing with you the following important updates on WSP USA's continued response to COVID-19:

- We are **delaying the full return to the office** until further notice.
- To comply with **President Biden's Executive Order requiring COVID-19 vaccines for employees of federal contractors**, all WSP USA staff must be **fully vaccinated by December 8, 2021** OR have an HR approved accommodation in place by a recommended date of October 25, 2021.
- We will soon send an invite to an **all-staff Town Hall for next Wednesday, October 13**.

Return to Office Delayed Until Further Notice

As of today, we have delayed our official return to office date until further notice. We recognize that continuously delaying the date is stressful. This does not mean we will never get back into the office in larger groups. Some important notes:

- We will give everyone at least 30 days' notice of the new return to office date. We'll also share more details of our hybrid work approach at that time.
- Our offices remain open, and we encourage staff to go in as often as possible for collaboration and camaraderie, of course while following all safety protocols.

Complying with Presidential Executive Order Requiring Vaccines for

Employees of Federal Contractors

In September, President Biden signed an Executive Order for employees of federal contractors and subcontractors to be fully vaccinated against COVID-19 by December 8, 2021.

Page 64 of 92

Tomeo Family Court

After consulting with legal counsel, we have determined that **the Executive Order requires essentially all WSP USA employees and our federal subcontractors to be fully vaccinated by December 8, 2021.**

Please note the following key considerations, according to the Executive Order and the White House's Task Force:

- Within WSP USA, the vaccination requirement essentially applies to everyone, regardless of an employee's duties within the company or work location, because of WSP USA's work sharing model.
- The only exceptions are employees who work overseas full time, and individuals who are legally entitled to medical or religious exemption approved by Human Resources.

While this creates a challenge for us, our work for the federal government is critical to our business in the U.S. We must comply with this Executive Order.

Page 65 of 92
